**WS 2021/22**

## **Financial Valuation** (Finanzmärkte und Unternehmensbewertung)

### **Course Outline**

The course gives an advanced introduction to financial analysis and to the principles of financial valuation. Applications include financial statement analysis, the valuation of firms as well as the measurement of corporate performance for exchange traded corporations. The course will also consider arbitrage pricing theory and related empirical findings. The techniques provide essential concepts for the work of financial accountants and analysts, certified accountants, stock brokers, financial consultants as well as to specialists with an interest in financial research. Further applications include the evaluation of corporate management decisions and issues in corporate governance.

### **Rules for Course Participation**

This course is open to all students of the program Bachelor of Business Administration and Economics. Active participation and discussion of the course contents is encouraged. Therefore, study of the given literature in advance of each class is recommended. Slides used in class can be downloaded from Stud.IP. Exercises, small case studies and discussion of research papers will complement the theoretical aspects of the class. Several parts of the course material and references are in English. However, the lecture language is German. There will be a final exam at the end of the semester. Hence, for course participation, basic knowledge of the German language is required.

## Timetable
