

Tine Köhler, *The University of Melbourne*, Australia

Workshop summary (max. 90 minutes, depending on number of participants)

The purpose of the workshop is to offer a discussion platform for how researchers can use the provided framework to advance their own theory building and testing. The workshop is specifically targeted at researchers who consider including a form of reproducibility or replication in their study design. Together, we will discuss how researchers can make their study designs more constructive and rigorous. Participants are strongly encouraged to bring their own research ideas and ideas for study design. We will then together discuss recommendations for incorporating reproducibility and replication into their designs.
