

Tine Köhler, *The University of Melbourne*, Australia

### **One-on-one meetings**

Dr. Köhler would be very happy to schedule one-on-one meetings with members of the faculty. The purpose of the meetings could simply be to get to know each other and network, or they could be for consultations. My methodological areas of expertise revolve around quantitative methods including regression, meta-analysis, and research design, as well as qualitative methods including grounded theory, case study analysis, ethnography, and interviewing. I am also happy to talk about my work on cultural differences and teamwork or share insights about the review process at any of the journals I am involved with.
