

RWE NPOWER ENERGY CHALLENGE

Now it's up to you: compete with international students and send us your ideas. What does your energy cost? How can an energy company respond to the complex challenges of climate change targets, maintain a secure supply for its customers and more importantly ensure that energy bills are affordable?

Be part of the challenge and register with your team by 2 January 2011 using the online application form. For more details, check out our website or contact us. www.access.de/energy-challenge ■ Martina Schmitz ■ Tel.: +49 (0)221 956 490 777

Just two of the organisations with which we are affiliated.
