PhD-Seminar Advanced Studies in Finance and Financial Control

WS 2020/21

The seminar is dedicated to advanced topics in the field of finance and financial control. It particularly addresses the following fields of interest:

- Applied financial econometrics
- Asset pricing and capital market microstructure
- Empirical finance, Empirical corporate finance
- Risk management
- Financial control

The seminar is addressed to participants who actively want to enhance their understanding in selected parts of the above areas. Contents will be discussed based on the following (non-exclusive) list of references, see Section II.

Participants should have acquired advanced skills in finance, applied statistics and econometrics, as well as background knowledge in probability theory and random processes (see e.g. Section I.).

Organizational details are given in Section III. Intense discussion of the contents within the seminar is encouraged.

I. General References

I.1 Finance

Huang C.-F., Litzenberger R. H. (1988): Foundations for Financial Economics, Elsevier/North-Holland, Amsterdam.

Ingersoll J. E. (1987): Theory of Financial Decision Making, Rowman & Littlefield, Totowa.

Merton R. C. (1990): Continuous-Time Finance, Blackwell, New York.

Shiryaev A. N. (1999): Essentials of Stochastic Finance – Facts, Models, Theory, World Scientific Publishing, River Edge.

I.2 Applied Probability

Grimmett G. R., Stirzaker D. R. (2001): Probability and Random Processes, 3rd ed., Oxford University Press, Oxford.

van der Vaart A. W. (1998): Asymptotic Statistics, Cambridge University Press, Cambridge.

I.3 Financial Econometrics

Brooks C. (2014): Introductory Econometrics for Finance, 3rd ed., Cambridge University Press, Cambridge.

Campbell J. Y., Lo A. W., MacKinlay A. C. (1997): The Econometrics of Financial Markets, Princeton University Press, Princeton.

Wagner N. (2020): Empirical Finance, Manuscript, University of Passau.

I.4 Econometrics and Statistics

Engle R. F., Granger C. W. J. (eds.) (1991): Long-Run Economic Relationships, Readings in Cointegration, Oxford University Press, Oxford.

Greenberg E. (2008): Introduction to Bayesian Econometrics, Cambridge University Press, Cambridge.

III. Organizational Issues

Type of Course:	Blocked seminar
Target Audience:	PhD Students in Business and Economics with a research interest in Corporate Finance, Financial Economics, International Financial Markets, Financial Econometrics and / or Financial Control.
Credit Points:	Creditable as a PhD Seminar
Contribution:	(i) Interactive contributions to the seminar <i>discussion</i> ; (ii) In-depth <i>presentation</i> of a relevant field of interest as treated in the references of Section II. Additionally, books from Sections I.1 and I.2 as well as individual book or literature review suggestions are possible choices. The presented field should relate to one reference or to several chapters of two references. All selections are subject to individual arrangement between supervisor and candidate. (iii) Based on the field of interest in (ii), a written three page <i>research proposal</i> , which includes benchmark paper references and the basic research idea.
Registration:	Application via Email to the Chair in Finance and Financial Control: fincon@uni-passau.de .
